

WORKERS' STATE OF HELASIA

ANNOUNCEMENT OF THE WORKERS' STATE OF HELASIA ON THE RECENT POLITICAL DEVELOPMENTS

During the latest days, we watch with great sorrow a rise of radical conservative ideologies. Specifically, we watched the phenomenon of some parents treating their children in a paternalistic and autocratic way.

In Greece, in the era of “western values” parents are allowed, without any punishment, to propagandise un-natural behaviours on matters of food consumption. Meanwhile, these parents don't allow their children to wear masks against COVID-19 in schools and public places.

The Workers' State of Helasia has laws on these matters. And these exact laws will be set in effect. The people of Helasia, the people-based institutions of justice it possesses, will inflict its justice, with respect to human rights. But, it has to be understood that this respect towards human rights, does not mean we will capitulate to the forces of eternal conservation and reaction.

For these reasons, the Presidium of the Workers' State will issue new laws, and it will update its intelligence community, while the responsible judicial organs will convene to issue decisions on these behaviours.

We call all the allied micronations to adopt this position in all these critical matters, and help in the establishment of an intermicronational committee on these issues.
